

**MOORE**

**LSC  
360**

## Combining Advisory and Environmental Technical Expertise

MOORE and LSC360 combine complementary advisory and technical expertise to support organisations in addressing sustainability challenges.

Together, we provide a practical approach that connects strategic objectives with technical assessment and implementation.

## Our Sustainability Support Services

### 01 Fit4Sustainability

Assess your sustainability performance through technical assessments such as carbon footprinting, followed by prioritised improvement measures and techno-economic studies to support implementation.

### 02 Asset Risk Management

Identify real estate assets at risk of becoming stranded and define the right timing, investment needs and strategy: renovation, certification, repositioning or disposal.

### 03 Tax Incentive Support

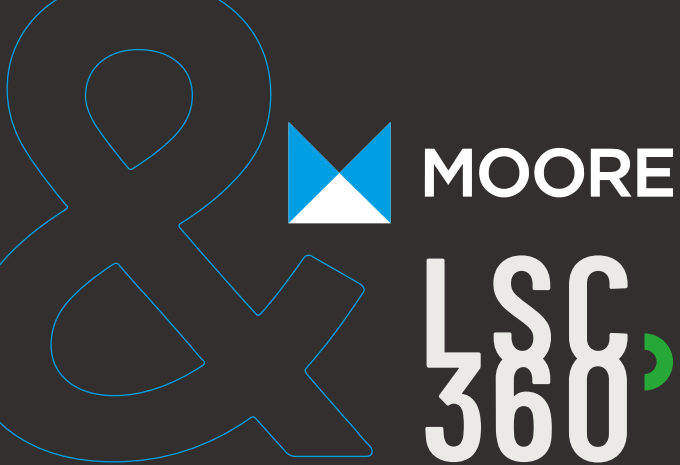

Identify sustainability investments that may qualify for Luxembourg's investment tax relief (bonification d'impôt), assess eligibility and support the preparation of the required technical documentation.

### 04 Public Subsidy Support

Identify relevant public funding for sustainability and renewable energy projects, and support the preparation of subsidy applications.

## Combining Advisory and Environmental Technical Expertise

MOORE and LSC360 combine financial, ESG advisory and technical expertise to turn sustainability ambitions into practical action.

Together, we connect strategic objectives and technical implementation with access to the right funding pathways.

## Our Sustainability Support Services

### 01 Fit4Sustainability

Turn technical sustainability assessment into credible ESG information by validating data, preparing sustainability action plans & disclosures: helping you respond confidently to stakeholder ESG requests.

### 02 Investment Assessment

Assess sustainability investments through a financial lens by identifying green CapEx and OpEx, considering Taxonomy alignment, and preparing key information for banks and investors.

### 03 Tax Incentive Support

Identify green investments for Luxembourg tax credits, assess eligible expenditure and support the financial documentation required for the application and certification process.

### 04 Public Subsidy Support

Identify relevant Luxembourg and EU funding opportunities, assess project and cost eligibility, and support the documentation and compliance requirements throughout the funding process.
